

**Cab-R 3D from SFS intec:  
adjustable designer pivot hinge for flush fit doors**

Design, load capacity and versatility are the main characteristics of this high end hinge which satisfies the aesthetical needs of modern design and structural needs required from the main interior door manufacturers.

The hinge Cab-R 3D, adjustable with a single Allen key in all 3 dimensions (height: 0/+3, lateral: +/- 1,5, gasket pressure: +/- 2 mm), enables the door to be left or right handed and the frame reversible. One hinge, covering all your production needs. With a very simple milling operation, it's possible to use this hinge on door panel thicknesses between 40 and 45 mm.

Thanks to its technical characteristics like the self lubricating bushes which guarantee a smooth and squeak-free movement during the lifetime of the hinge, Cab-R 3D has successfully achieved a 200.000 cycles with a door weight of 80 Kg.

This innovative hinge is the result of continuous developments conducted by SFS intec into materials and moreover into the market and the needs of companies producing this type of door.
