

SPAX®

The ideal screw for
wooden facades

**Approved by
the German building
authorities**

**With
CUT point**

Benefits in outdoor use:

- No splitting or bulging of the wood
- Easy, strong screw fastening due to patented ground serrations
- Ribs under the head ensure clean countersinking
- No rust formation on the façade

INOX
STAINLESS STEEL

SPAX®
a better way of driving the point home.

The ideal screw for

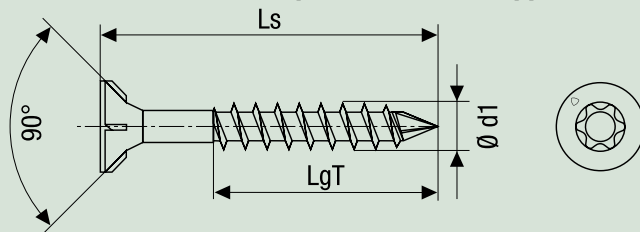

wooden facades

No splitting or bulging in the wood – the *CUT point* easily cuts through the wood fibres.

Ribbed head countersinks flush with the wood surface.

Perfect for tongue-and-groove fastening.

SPAX® Rust-free with the *CUT point* for outdoor applications

Dimensions [mm]				Packaging units [pieces]
