

Correct 2K-Holzspachtel CHS

Product description

ZWEIHORN CORRECT 2K-Holzspachtel CHS is a bi-component stain surfacer on the basis of unsaturated polyester resin with fillers. The pertaining catalyst paste is based on benzoyl peroxide. Information about the measures of precaution to be taken can be found on the safety data sheet. The surfacer is wood-coloured and is very well suitable for non-shrinking repair of defects such as broken corners or edges as well as for greater holes on nearly all surfaces.

Processing recommendations

- Prior to the application, CORRECT 2K-Holzspachtel CHS must be mixed with the catalyst paste. When doing so, take care that the catalyst is distributed homogeneously.
- The mixing ratio may neither fall below nor exceed 3 parts of the catalyst paste on 100 parts of CHS. Wrong dosing of the catalyst paste may cause deviations of the colour shade, e.g. in the case of subsequent painting.
- The surface must be clean, dry and grease-free. A good adherence is obtained if the defective surface has been roughly sanded before.
- The pot life is approx. 5 minutes at room temperature. Therefore only mix such a quantity, which is required to fill the defective surface.
- The filled surface can be subsequently treated after approx. 15 minutes. Heat shortens, cold prolongs the curing time. For further processing, fine sanding (320 grit paper) is required.
- CORRECT 2K-Holzspachtel can be stored for 6 - 8 months, the closed tubes with catalyst paste can be stored for 20 months.

Zweihorn products are produced for the professional user, who has a basic knowledge of the stockturn and the application of stains, varnishes, glazes and glues. The user information for our qualities given in the leaflets should be regarded as non-binding recommendations. They are based on our test series and experiences and should facilitate and promote the work of our clients. A possible necessary adjustment to the individual working conditions lies within your responsibility. If in any doubt, our material experts as well as our application and laboratory technicians will try to help you as best as they can. We guarantee of course the impeccable quality of our products based on our General Sales and Delivery Conditions. All current technical data sheets are herewith voided. The use of the final product lies entirely within the responsibility of the buyer. As long as we haven't guaranteed in writing specific characteristics and suitabilities of the products for a contractually agreed purpose, any advice or information given regarding the application, even if the advice or information is given to the best of our knowledge, will be non-binding. Nor does it relieve the buyer, either from his own inspection, and if need be through a trial processing. Furthermore, we are only liable according to Chapter 1 of our General Conditions for advice either given or rejected, which does not refer to the characteristics and use of the delivered product.
