

# FEX<sup>®</sup>-RS

## Shutter screw

*for snap fastening  
of roller shutter guides*

### FEX<sup>®</sup>-RS: *Snap fastening of profiles*

- Needle point: no pre-drilling of plastic profile required
- Sharp thread extending to just below the head
- Collated available on request

## Shutter screw

*with needle point for snap fastening of roller shutter guides*

The **FEX®-RS** self-drilling screw is driven into the frame profile.

The combination of a sharp, 5-mm wide thread with optimised snap-on head geometry provides excellent grip, withstanding the high axial tensile forces that occur in snap-on profiles such as shutter guides, drip covers, covering sections and wall connection profiles.

Available on request.
