

Spezial Sunblocker SB

Product description

Spezial Sunblocker SB is a new, innovative Zweihorn product for the protection of many species of wood against yellowing. Since it is an additive for solvent-based clear varnishes, you will save one additional operation, which would be necessary with normal yellowing blockers. Clear varnishes with Spezial Sunblocker SB added noticeably show that yellowing is stopped, because most of the ultraviolet rays in sunlight and daylight have been blocked. Unequally exposed wood, e.g. in the area of windows and/or covered by objects such as posters, paintings, desk sets, telephones, vases, etc. will no longer show colour variations. Spezial Sunblocker SB has the best effect when it is added to the primer and the coating varnish.

Range of application

Spezial Sunblocker SB is particularly used for light wood, which shall be protected against yellowing. Due to the broad range of application, clear varnishes modified with Spezial Sunblocker SB can be used on veneered and solid wood of almost all interior objects in order to keep the natural appearance. Even stained surfaces can be lastingly protected against colour variations by means of Spezial Sunblocker SB.

Application

Spezial Sunblocker SB can be used as additive to all solvent-based clear Zweihorn varnishes. We recommend using it in lightfast clear two-pack polyurethane varnishes such as Purolit, Crystallit or DiaDur.

The amount of 10% to be added is recommend for primer and coating varnish each.

Product data

Batch size	1 l
Shelf life in unopened original batches	approx. 2 years

Further information can be obtained from the label and the Safety Data Sheet according to 91/155/EWG, which you can download from the Internet under www.zweihorn.com or which you can request from us.

Special notes

- We recommend using Spezial Sunblocker only on light wood.
- In the case of dark wood, e.g. walnut or mahogany, we do not recommend the application of Spezial Sunblocker SB, because these species of wood will not darken but become pale under the influence of ultraviolet light. Spezial Sunblocker cannot slow this effect down.
- Always read the technical data sheet of the clear varnish prior to the application.
- When Spezial Sunblocker SB is used, the recommended amount of thinner added to the respective clear varnish can be reduced by 10%.

Zweihorn products are produced for the professional user, who has a basic knowledge of the use and the application of stains, varnishes, glazes and glues. The user information for our qualities given in the leaflets should be regarded as non-binding recommendations. They are based on our test series and experiences and should facilitate and promote the work of our clients. Any adjustment to the individual working conditions, which might be possible, lies within your responsibility. If in any doubt, our material experts as well as our application and laboratory technicians will try to help you as best as they can. We guarantee of course the impeccable quality of our products based on our General Sales and Delivery Conditions. The use of the final product lies entirely within the responsibility of the buyer. As long as we have not guaranteed in writing specific characteristics and suitability of the products for a contractually agreed purpose, any advice or information given regarding the application, even if the advice or information is given to the best of our knowledge, will be non-binding. Nor does it relieve the buyer, either from his own inspection, and if need be through a trial processing. Furthermore, we are only liable according to Chapter 1 of our General Conditions for advice either given or rejected, which does not refer to the characteristics and use of the delivered product.

Applicable is the current Technical Data Sheet, which can be downloaded under www.zweihorn.com. Previous technical data sheets are voided with the issue of a new version.
